REPORT NO. 210

5 April 1946.

MEDICAL ANALYSIS SECTION
5250th Technical Intelligence Company
APO 500

5 April 1946.

Pannier, Gas Casualty Treatment,
Medical Officer's, Field

SOURCE: Tokyo, Japan.

IMPORTANCE: Not previously reported.

DESCRIPTION: This item consists of two cases which are canvas covered and lined. They resemble "Siamese" suitcases, being attached at the lower edges of the adjacent sides by means of a short length of rope laced through canvas flaps. The set weighs approximately 50 pounds and together the two cases measure 27 1/2" x 15" x 14". The cases are painted an olive drab color and the Geneva Red Cross appears on two sides along with several Japanese characters which are translated as "Troop Medical Pannier".

Leather handles are attached at the top of each case for carrying. A large metal hasp serves to hold the cases together at the top and two leather belts strap about the cases, adding further support.

In opening either case, the lace binding which makes the cases a single unit becomes a hinge so that the cases can be spread to 180°. Access to the interior of each case is made through the adjacent sides which are constructed of two layers. The inner layer, canvas covered wicker, is hinged at the lower edge and opens toward the center. The outer layer of canvas is folded open.

Case "A" is composed of one compartment while

Case "B" is partitioned, forming one smaller compartment at one end and a section of cylindrical compartments in which bottles are kept at the other end. On the inner layer of the opened side of each case are several canvas jackets. On the inside of the outer layer is a table of contents.

All the medical items contained in the set are of standard quality and have been previously reported. An inventory of the contents is included in this report.

COMMENT: This set has a large and well selected choice of medical supplies. It is well equipped to cope with gas casualties in the field.

Pannier, Gas Casualty Treatment,
Medical Officer's Field

INVENTORY OF
PANNIER, GAS CASUALTY TREATMENT, MEDICAL OFFICER'S FIELD

CASE "A"

Ringer's solution	amp	2
Benzene	gm	300
Solution, glucose, concentrated	amp	20
Solution, caffeine sodium benzoate	amp	10
Solution, novocaine	amp	10
Tablets, chloramine	ea	150
Solution, pavinalatropin	amp	10
Solution, B-camphor	amp	50
Solution, quinine, sterilized	amp	50
Solution, Lobelin	amp	10
Solution, sneeze stopping	amp	20
Water, distilled, sterilized	amp	5
Cup, eye washing	ea	10
Spectacles, for the near sighted	pr	5
Sprayer	ea	1
Holder, for eye bandage	ea	10
Bosom warmer	ea	5
Serum, gas gangrene	amp	40
Bottle, glass	ea	4
Bleaching powder, high degree	gm	450
Carbon, medical	gm	100
Zinc oxide	gm	100
Ointment, ferric hydroxide	gm	100
Tablets, sodium bicarbonate	ea	200
Solution, pneumonia prophylactic	gm	100
Dropping bottle	ea	1
Eye ball washer	ea	1
Tablets, codeine	ea	50
Ointment, peridol	gm	100
Tablets, veronal	ea	50
Sodium hydroxide	gm	25
Ointment, alkaline	gm	40
Ointment, liver oil	gm	200

CASE "B"

Flashlight	ea	2
Set, eye dropping bottles	ea	1
Gauze	pkg	50
Fuel, solid	pkg	20
Bandage, rolled	ea	20
Cotton, roll	ea	2
Tube, rubber	meter	1
Cloth, rubber	sheet	1

Gloves, rubber	pr	5
Bandage, triangular	ea	50
Bosom warmer	ea	5
Adhesive plasters, zinc oxide	ea	5
Mask	ea	50
Paper, cellophane	sheet	20
Disinfecting pump	ea	1
